DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The Prior Art does not fairly teach or suggest a micro-machined capacitive pressure sensor and method of operating same having a plurality of *sealed micro-machined capacitive cells of type 1*, each cell including a rectangular membrane supported above a common conductive electrode by an insulating support and conductive electrode for each membrane supporting a conductive for movement therewith whereby each electrode forms with the common conductive electrode a capacitor whose capacitance varies with movement of the membrane relative to the common electrode, a cavity region formed by the the membrane and the conductive electrode, and conductive lines interconnecting conductive electrodes of adjacent cells of type 1; a plurality of micro-machined capacitive cells of type 2, each cell including a rectangular film stack on a common conductive electrode by an insulating support and each stack supporting a conductive electrode therewith whereby each electrode forms with the common conductive electrode a capacitor whose capacitance does not vary with movement of the film stack, *and conductive lines interconnecting conductive electrodes of adjacent cells of type 2.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
